

DiamaDots Polishing System

More Diamonds for your money!... More Dots for your money!

Save by getting more than 50% more dots on 15" & 17" pads, without paying more.

1st Generation
Vortex

2nd Generation
DiamaDots™

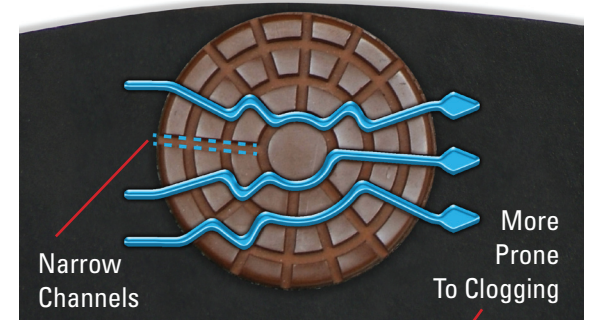

2nd Generation Rubber Dot Technology Last Longer and Cut Faster with Even Better Refinement

DiamaDots wedge-shaped dots put more diamonds on the outer perimeter of the pad, improving both cutting speed and edge refinement. Wider, directional water channels increase water flow, effectively flushing slurry away from the cutting surface, improving both life and refinement while at the same time reducing slurry clogging and cleanup time. Improved, proprietary, 2nd generation resin dot formulations are available ONLY through Superior Surface Solutions.

Better Refinement on Uneven, Imperfect Floors

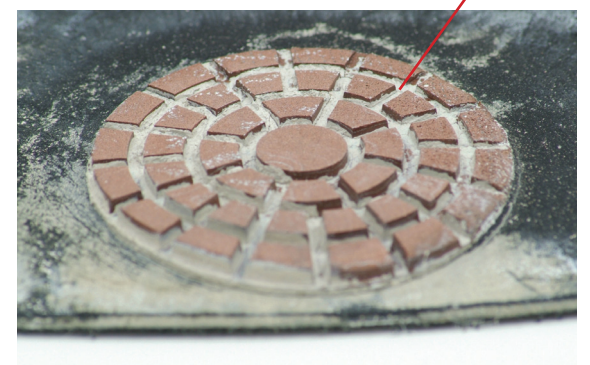

DiamaDot rubber dot pads utilize a thicker rubber backer to match the long life of the DiamaDots. When the flexible rubber dot pad is attached to the high density foam backer and the Vortex Polisher's flexible pad driver, DiamaDots are able to follow the contours of even extremely wavy concrete floors without leaving unsightly scratches. While traditional grinders are flattening wavy floors sufficient to polish without scratches, the Vortex Polisher is polishing, producing unmatched uniformity of aggregate exposure. The Vortex Polisher utilizing DiamaDots minimizes surface cream removal while producing floors with outstanding clarity (DOI) and gloss.

One Step Floor Prep for Dyes and Pigments

DiamaDots are a great way to quickly prep concrete floors for water or solvent based dyes and stains. DiamaDot 50 grit pads grind aggressively enough to prep most floors in just one step while leaving a scratch free surface ready to be stained and sealed.

21" DiamaDots are for use on the Vortex Polisher
15" and 17" DiamaDots are for use on the DiamaShine Polisher/Edger

C-Dot™

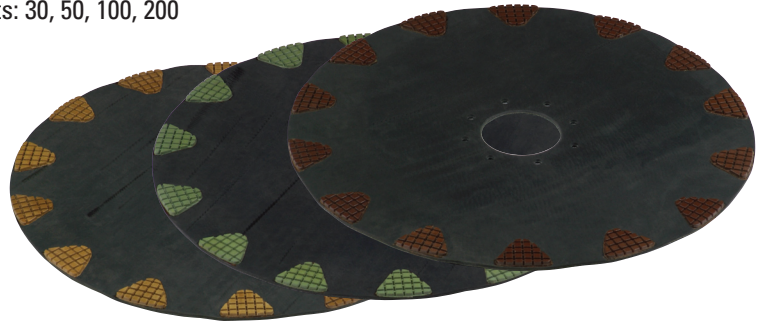

Copper Resin dots for fast cutting, superior refinement and long life.
Use on concrete, terrazzo, marble, granite or any polishable stone
Grits: 30, 50, 100, 200
Wet Only

R-Dot™

Resin dots produce incredible clarity and gloss
Use on concrete, terrazzo, marble, granite or any polishable stone
Grits: 400, 800, 1500, 3000
Wet Only

Diamadot Plus - Available Soon

Metal resin dots for the fastest cutting on the hardest floors
Grits: 30, 50, 100, 200
